PROFESSIONAL SUMMARY

Game Development student with experience building object-oriented C++ applications and multi-file console projects. Strong foundation in problem-solving, debugging, Git version control, and gameplay system development. Interested in gameplay programming and opportunities to continue developing technical skills through academic and personal projects.

TECHNICAL SKILLS

Programming Languages: C++, HTML, CSS

Software & Tools: Visual Studio, Git, GitHub, Microsoft Office

Technical Concepts: Object-Oriented Programming, Classes & Objects, Functions, Vectors, Data Structures, File I/O, Input Validation, Debugging, Memory Management, Version Control, Pull Requests

TECHNICAL EXPERIENCE

Dungeon Exploration Simulator - Current Course Project

- Developed a multi-file C++ console game using object-oriented programming.
- Implemented Game, Player, Room, Enemy, and Item classes with clear responsibilities.
- Built movement, turn-based combat, inventory, traps, healing, treasure, and exploration systems.
- Used Git and GitHub for commits, branches, Issues, milestones, and pull requests.
- Tested, debugged, and refactored the application through four development milestones.

PROJECTS

Dungeon Exploration Simulator

Text-based dungeon exploration game where the player navigates a 3x3 dungeon, battles enemies, encounters traps, collects items, and works toward defeating the Dungeon Guardian. The project demonstrates object-oriented design, 2D vectors, gameplay logic, debugging, refactoring, and iterative development.

Technologies: C++, Visual Studio, Git, GitHub

Repository/Profile: <https://github.com/WilliamRW-PGII>

EDUCATION

Full Sail University

Bachelor of Science in Game Development

Expected Graduation: May 2027

Relevant Coursework:

- Programming Fundamentals
- Object-Oriented Programming
- C++ Programming
- Project & Portfolio
